INTRODUCTION

Note: All respondent must be 20 years old and must be a key decision maker in the family with knowledge of the financial and business affairs of the household.

Hello. My name is ………… I came to discuss the Millennium Challenge Account-Mongolia “Property Registration Project” with you. MEC LLC and MCDS LLC are conducting the baseline of the “Special Hashaa Plot Survey.” The survey is not directly managed by the Millennium Challenge Account-Mongolia Project Implementation Unit but the information gathered will be utilized by Millennium Challenge Account-Mongolia to learn more about the “Property Registration Project.” I expect that the discussion will continue for about an hour and a half. During this time, I would like to ask you about the demographic and economic characteristics of your household, as well as your hashaa plot, and its registration status.

With your permission, I would like to record your responses in this questionnaire. The information you provide will only be used for project planning purposes and will be kept confidential and analyzed only by the Millennium Challenge Account-Mongolia analysis unit and their contracting analysts from the United States of America. The information will not be used for tax purposes and will not be given to the government except before all identifying information has been removed. To compensate you for your time in completing this interview we would like to offer you 1500 tugriks for your mobile phone. Your participation will improve the work being carried out by the project and is highly appreciated. You have the right not to participate and you have the right to stop the interview at any time or decline to answer any of the questions posed. If you are willing to be interviewed please indicate this by giving your verbal consent now.

☐ Check the box “X” if respondent’s verbal consent is given.

## SECTION 18: RISK AVERSION (APPLY TO EVERYONE)

Now I will present you with a series of options. For each question you have two hypothetical choices, of which you will have to choose one.

a. Option A: A fixed payment that you would get for sure
b. Option B: A game where you have a 50/50 chance of either winning nothing or winning a 100 000 tugrugs.

I will offer a payment of X tugrugs in option A, the amount of which will increase each time. Option B will never change. Every time I offer you a payment you have the choice to play the game in option B, or take the payment instead of playing.

Which option would you prefer, A or B? *Enumerators code: 1=respondent chose option A, 2 = respondent chose option B*
